Dawit Sileshi

Data analysis and visual design

Addis Ababa, Ethiopia dawitsileshi45@gmail.com +251 932 15 10 71 dawitsileshi.netlify.app

PROFILE

Software engineer with a background in graphic, print and motion design, now focused on data analysis. I clean and analyse data in SQL, check results against published figures, and design the charts and documents that present them. I use AI tools daily for code and drafting and verify their output before it ships.

SELECTED WORK

Phones Without Accounts: insight brief 2026

Independent analysis · World Bank Global Findex 2025 microdata

- Analysed 1,001 weighted survey responses in PostgreSQL to find who in Ethiopia owns a phone but has no account; validated the weighting against the published 48.8% account rate.
- Designed a two-page brief with three charts, uncertainty intervals and a methods note.

Africa Digital Finance Indicators: dashboard 2026

Independent analysis · 35 countries, Global Findex 2025

- Built a nine-indicator set in SQL with written definitions, population-weighted regional figures and 95% margins; Ethiopia matched all three published figures.
- Designed an interactive dashboard: scorecard, ranked comparison, table view and indicator dictionary.

EXPERIENCE

Software developer and IT support 2022 – present

Danakil Hotel · Addis Ababa

- Built the hotel's website (2022) and provided ongoing network and technical support.
- Building and running a hotel, food-and-beverage and retail management system on PostgreSQL and Node.js, with an on-site server and an online mirror for sync and backup (2025 – present).

Freelance graphic and print designer 2022 – present

Independent

- Print, signage and social media design for local clients, including health education posters for Tikur Anbessa Hospital via Tikur Tech (2022).
- Automated repetitive Photoshop production with scripting.

IT Trainer 01/2020 – 03/2022

NeuovaTech Technology Institute PLC · Addis Ababa

- Taught graphic design, advanced Excel and programming courses to adult learners.
- Produced graphic and motion design content for advertising; also covered CCTV operation and customer support.

PROJECTS

- **sile enat (ስለ እናት):** anonymous support platform for mothers with postpartum depression. 2nd place, ALX Ethiopia Wellness Hackathon.
- **Geospatial analysis:** Google Earth Engine and PostGIS work on land and carbon data for Ethiopian agriculture.

DATA

Excel (advanced; taught it)

SQL / PostgreSQL: joins, CTEs, window functions, survey weighting

PostGIS, Google Earth Engine

DataGrip

Python (learning)

DESIGN

Adobe Photoshop (incl. scripting)

Adobe After Effects

Print production and layout

Taught graphic design

WEB

HTML, CSS, JavaScript

React, Node.js, FastAPI

Ubuntu server deployment

AI TOOLS

Claude, ChatGPT, Claude Code for analysis, code and drafting, with independent checking

EDUCATION

BSc Software Engineering
Mekelle University, 2019 · GPA 3.46

AI Career Essentials
ALX Ethiopia, 2026

Digital Marketing
TrainGobeze, 2022
